Some Important Points

This is a penny Stock so it is riskier bet and I feel that it will give you positive returns in coming years with very less investment and try to always put some money in penny stocks in your portfolio if it shoots up then it will give you huge returns in future.

Some Examples I am going to give here please check their Charts.

1.) Prima Plastics :-

<http://www.moneycontrol.com/india/stockpricequote/plastics/primaplastics/PP21>

This Stock Zoom from Rs 10 to 200 in time period of 2013 – 2016.

2.) Vinyl Chemicals :-

<http://www.moneycontrol.com/india/stockpricequote/chemicals/vinylchemicalsindia/VCI02>

This Stock Zoom to 10 Rs to 90 Rs from 2014 – 2016.

3.) Ahluwalia Contracts India (This Company is also related to the Constructions but see their price movement its amazing.)

<http://www.moneycontrol.com/india/stockpricequote/construction-contracting-civil/ahluwaliacontractsindia/ACI12>

This Stock is dealing with construction same as Tantia its Price Moves 15 Rs in 2013 to 300 Rs in 2016.

There are lots of example but the important thing is that we are in the stock market to multiply our capital and we also know that risk taking bets are highly rewarding. Without risk no gain ("no pain no gain"). Now in portfolio add this type of stocks with suitable amount so that if it moves up then it will give you some big returns.

*It is better than unitech right now.

*Invest only those stocks which are not discussing by others or recommended by other people.

Investment is your decision but I assure you this type of strategy multiply your capitals in very limited period of time.

Thank you.
